

The `eso-pic` package*

Rolf Niepraschk
Rolf.Niepraschk@gmx.de

1 Introduction

This package makes it easy to add some picture commands to every page at absolute positions.

2 Usage

See also the example \LaTeX documents (`eso-*.tex`).

2.1 Basic commands for adding \LaTeX stuff to the page background

<code>\AddToShipoutPicture</code>	All the picture commands which are parameters of an <code>\AddToShipoutPicture</code> command will be added to the internal macro <code>\ESO@HookI</code> . This macro is part of a zero-length <code>picture</code> environment with basepoint at the lower left corner of the page (default) or at the upper left corner (package option "texcoord"). The <code>picture</code> environment will be shipped out at every new page.
<code>\ClearShipoutPicture</code>	A call of <code>\ClearShipoutPicture</code> clears the contents of <code>\ESO@HookI</code> .
<code>\AddToShipoutPicture*</code>	<code>\AddToShipoutPicture*</code> works like <code>\AddToShipoutPicture</code> but only for the current page. It used the internal macro <code>\ESO@HookII</code> which contents will be removed automatically.
<code>\LenToUnit</code>	Allows a length as parameter to a picture command.
<code>\gridSetup</code>	<code>\gridSetup[\langle gridunitname \rangle]{\langle gridunit \rangle}{\langle labelfactor \rangle}{\langle griddelta \rangle}{\langle gridDelta \rangle}{\langle gap \rangle}</code> . For details see the implementation section.
<code>\AtPageUpperLeft</code>	Helper macros for easier positioning on the page.
<code>\AtPageLowerLeft</code>	
<code>\AtPageCenter</code>	
<code>\AtTextUpperLeft</code>	
<code>\AtTextLowerLeft</code>	
<code>\AtTextCenter</code>	
<code>\AtStockUpperLeft</code>	
<code>\AtStockLowerLeft</code>	
<code>\AtStockCenter</code>	

*This document corresponds to `eso-pic v2.0a`, dated 2009/10/07.

2.2 Package options

Option	Value	Comments
<code>pscoord</code>	empty or <i>true, false</i>	The zero point of the coordinate system is the lower left corner of the page (the default).
<code>texcoord</code>	empty or <i>true, false</i>	The zero point of the coordinate system is the upper left corner of the page.
<code>grid</code>	empty or <i>true, false</i>	A grid is drawing; default: false.
<code>gridunit</code>	<i>mm, in, bp, pt</i>	Distance between gridlines are multiples of <code>gridunit</code> . default: mm.
<code>gridcolor</code>	a valid color name	Color of the main gridlines; default: black
<code>subgridcolor</code>	a valid color name	Color of the subgridlines; default: black.
<code>subgridstyle</code>	<i>solid</i> or <i>dotted</i>	‘dotted’ is very slow! default: solid.
<code>colorgrid</code>	empty or <i>true, false</i>	Shortcut for ‘grid=true’, ‘gridcolor=red’ and ‘subgridcolor=green’; default: false.
<code>dvips</code>	empty or <i>true, false</i>	Is also true if the package option <code>dvips</code> is used by <code>color</code> or <code>graphics</code> . If true package <code>eepic</code> is loaded for better performance of dotted lines.

3 Implementation

3.1 The main functionality

```
1 \RequirePackage{atbegshi}

\LenToUnit
2 \providecommand*\LenToUnit[1]{#1@gobble}

\ESO@isMEMOIR Support for the memoir class.
3 \newcommand\ESO@isMEMOIR[2]{#2}

Add the grid to the shipout picture (`\ESO@HookIII` is independent from the user commands `\AddToShipoutPicture` and `\AddToShipoutPicture*`).

291 `\ifESO@grid\g@addto@macro\ESO@HookIII{\ESO@gridpicture}\fi`

Change History

v0.4	General: Initial version 1	instead of <code>\newcommand</code> for <code>\LenToUnit</code> 2
v0.5	General: Some bug corrections . . . 1	v1.1
v0.6	General: Some corrections for compatibility with the <code>html</code> package suggested by Ross Moore and a licence note 1	General: New commands and package options for background grids. 1
v0.7	General: New command <code>\AddToShipoutPicture*</code> 1	v1.1a
v1.0	General: New commands <code>\LenToUnit</code> , <code>\AtPageUpperLeft</code> , <code>\AtPageCenter</code> , <code>\AtTextUpperLeft</code> , and <code>\AtTextCenter</code> 1	<code>\ESO@gridpicture</code> : Font setting added. 8
v1.0a	<code>\ClearShipoutPicture</code> : Changed <code>\let</code> to <code>\global\let</code> (suggested by Alberto Lusiani). . . . 4	v1.1b
v1.0c	General: New command <code>\AtTextLowerLeft</code> and corrections to <code>\AtTextUpperLeft</code> . . . 1	General: New command <code>\AtPageLowerLeft</code> 1
v1.0d	<code>\LenToUnit</code> : Using <code>\providecommand</code>	New package options "texcoord" and "pscoord" 1
		v1.1c
		General: Remove the disadvantageous check of 'pdfTeX'. Now using with X _ε LaTeX should be possible. 7
		v2.0a
		General: Better test of color/xcolor 7
		<code>\AtStockCenter</code> : New 3
		<code>\AtStockLowerLeft</code> : New 2
		<code>\AtStockUpperLeft</code> : New 3
		<code>\AtTextUpperLeft</code> : Works now for class <code>memoir</code> 3

Index

Numbers written in *italic* refer to the page where the corresponding entry is described; numbers underlined refer to the code line of the definition; numbers in *roman* refer to the code lines where the entry is used.
